PRODUCT: INSTiNCT S

RETAIL PRICE: -.00 €

INSTiNCT S

TRUST YOUR INSTiNCTS.

KEY FEATURES:

HIGHLIGHTS

- Glove like fit with a powerful toe.
- High precision for a slip-on model

NEW FEATURES

- CTS tension system.
- Hand made XS Grip 2 heel with M50 inlay.
- REB elastic closure remains stronger for longer.

DESCRIPTION:

The new INSTiNCT S is a slipper with extra toe power, taking advantage of the new CTS technology. It offers surprisingly high toe precision for a slip-on shoe, with the elasticated fit of M50 rubber combined with tension rubber. Featuring a slightly asymmetrical, downturned shape, with a medium angled toe box.

SEASON: SS 2022
CATEGORY: SPECIALIZED PERFORMANCE
PRODUCT: INSTINCT S

TECHNICAL DETAILS:

FIT:

A CENTER SHAPED SHOE TOE
 where the toe point is longest at the centre of the toe box.

A MEDIUM VOLUME
 best suited for users with a medium width foot.

SHAPE:

MEDIUM ASYMMETRY
 These shoes exhibit a medium angle of asymmetry in the shoe shape from the heel to the toe tip giving a balance of toe power, flex and comfort.

HIGHLY DOWNTURNED
 These shoes exhibit a high angle of down turn in the shoe shape from the heel to toe tip increasing the focus of power at the tip of the shoe.

UPPER:

Multi-panel upper with seamless big toe panel and seamless four-toe panel for the best custom molding fit. Full microfiber upper with REB reinforced elastic closure.

INSOLE:

Half-length Flexan 1.0mm insert spreads the force in the forefoot and allows for excellent flexibility in the rear of the shoe.

ACTIVE RANDING:

CTS
 TENSION
 SYSTEM

CTS-Combined Tension System

The CTS is a combination of elastic tension rubber that controls the length of the shoe and soft high friction rubber that surrounds the forefoot.

The soft M50 rubber evenly distributes power around the toe area and reduces pressure on the little toes. The harder tension rubber supports the big toe area and inside edging zone and is directly connected to the heel. The result is outstanding strength and precision on small footholds.

SOLE:

VIBRAM XS GRIP2 RUBBER

½ length split sole, with 3.5 mm Vibram® XS Grip2 rubber under the forefoot and heel. Vibram® XS Grip2 delivers excellent friction with enough firmness for moderate edging.

TECHNOLOGIES:

REB REINFORCED ELASTIC BAND

REB
We combined the upper elastic band of the classic slipper design with the innovative rubber-string system to create the REB and offer a dependable and long-lasting fit. Narrow shaped strings of PU are bonded with the elastic to strengthen it ensuring that the slippers stay glued to your feet time after time.

RUBBER COMPOUNDS

M50 RUBBER

M50 Rubber
M50 is our softest rubber compound offering the best levels of adaptability to the natural curves of the foot and toes. This morphing rubber compound is developed for use in our SRT system, toe patches and strategic positioning around the shoe upper.
