

RUSH 2 PRO^{GTX} + RUSH 2 PRO^{GTX} WMN

63133/200 & 202

PRODUCT POSITIONING

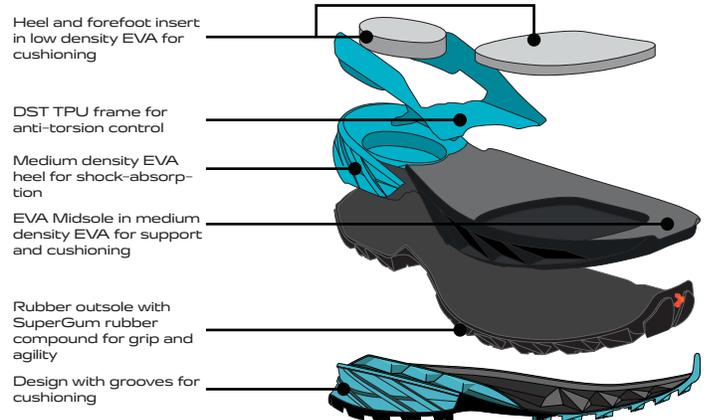

Running shoe comfort and agility meets trail worthy traction and support in the Rush 2 Pro GTX. The nubuck upper backed by GORE-TEX® means a refined look with durable waterproof protection. The trail running inspired outsole feels fast and efficient underfoot but still provides secure traction. The Rush 2 Pro GTX will become your go-to trail companion for just about any outing you can dream up

M 63133/200

- PROPULSION AREA
- BREAKING AREA
- MAXIMUM GRIP AREA
- ACTIVE CUSHIONING ZONE

FEATURES AND BENEFITS

- 01** **Upper:** Durable Nubuck leather and fabric upper with recycled content is lightweight and breathable, backed by GORE-TEX® ePE Bluesign® for waterproof protection.
- 02** **Rand:** TPU Rand for extra toe protection.
- 03** **DST Frame:** Dynamic Stabilizer Torsion frame gives rear-foot stability and torsion control.
- 04** **Midsole:** Dual-density compression molded EVA for lightweight cushioning and responsiveness.
- 05** **Outsole:** PRESA® outsole works with the midsole to provide mechanical impact absorption, and our SuperGum rubber compound provides confidence-inspiring traction.

SPECIFICATIONS

- Upper:** Nubuck Leather + Fabric (Recycled Content)
- Lining:** GORE-TEX® ePE Bluesign® - PFAS Free
- Insole:** Strobel (PSC) + DST TPU Frame
- Midsole:** 2D EVA-CM
- Outsole:** PRESA® HIK-01 / SuperGum
- Last:** (M) SCH
(W) SCH
- Sizes:** (M) 40-46 (½ sizes); 47-48 (whole sizes)
(W) 36-42 (½ sizes)
- Weight:** (M) 400g; 14.1oz (1/2 pair size 42)
(W) 330g; 11.6oz (1/2 pair size 38)
- Origin:** Vietnam

TECHNOLOGIES

RUSH 2 PRO^{GTX} + RUSH 2 PRO^{GTX} WMN

63133/200 & 202

TECHNOLOGY · MATERIALS · CONSTRUCTION

PRESA® Outsole with Interactive Kinetic System™ (IKS) — PRESA® is SCARPA's proprietary outsole brand, born out of 80+ years of technical outsole design experience, to deliver the best traction solutions available. IKS technology features seven internal impact absorption "domes" in the outsole and midsole that function just like shock absorbers, compressing upon impact to absorb energy. The impact zones are anatomically mapped to provide additional shock exactly where it is needed the most, while maintained stability outside those zones. The midsole material itself is dual-density EVA, providing additional lightweight shock absorption. Incorporated into the midsole is a Dynamic Stabilizer Torsion frame made of TPU (thermoplastic urethane). The DST frame wraps under the arch and extends back along both sides of the heel, for outstanding rear foot stability and torsion control. The lug design of the outsole provides confidence-inspiring traction via 4mm deep lugs and our SuperGum rubber compound, which balances high friction with durability.

SuperGum Rubber — Exclusive to SCARPA, the SuperGum rubber compound was developed to provide equal or better slip resistance as compared to other high-friction rubbers but with vastly superior abrasion resistance. It was formulated to deliver high friction performance in both wet and dry conditions, but at the same time offers 3 times the abrasion resistance. SuperGum is the ideal rubber compound for SCARPA approach shoes.

GORE-TEX® ePE — GORE-TEX® ePE membrane is a revolutionary new waterproof/breathable material that is light, strong and made without PFAS, setting the standard for technical storm protection. This new GORE-TEX® enable a lower carbon footprint through the use of a new lower-mass membrane and selected textiles.

SCARPA Planet Friendly — Our products are used to access the most wonderful and unspoiled landscapes on earth. We feel we must do our best to help preserve these landscapes for both current and future generations. The Planet Friendly designation appears on products designed to tread lighter on the planet, using eco-friendly resources and processes like recycled content materials, vegan friendly sourcing and plant-based plastics.

SOCK-FIT^{LW} BY SCARPA

Sock-Fit LW System — Sock-Fit LW, or "Light Wrap" construction, is the most minimal version of Sock-fit that SCARPA offers. Most of our Trail Running models incorporate this innovative construction. The Sock-Fit LW system uses a stretch material combined with a minimal, stretch tongue that wraps both sides and the top of the instep, eliminating the tradition gusset construction, providing gentle pressure and support to both reduce bulk and enhance the fit of the shoe.

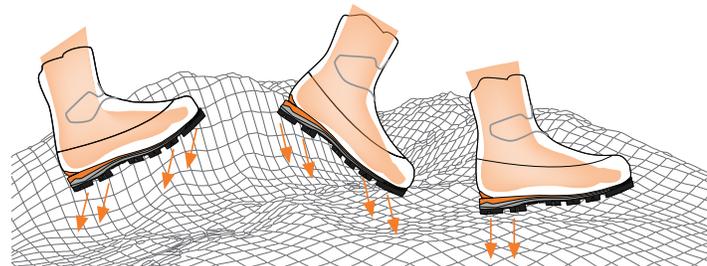

ACTIV^{fit} SYSTEM

ACTIVfit Technology — ACTIVfit is a construction system that employs different last shapes, material combinations and construction techniques to provide the optimal fit and performance for the intended activity.

ACTIV^{impact} TECHNOLOGY

ACTIVimpact Technology — ACTIVimpact is a technology applied to the soles construction that uses materials with physical and chemical characteristics that absorb negative impacts with the ground and increase shock-absorbing features exploiting the utmost energy used during the activity.

FIT:
SHC last. Medium volume heel and mid-foot fit, with a rounded, more open toe profile. Leans more towards a comfort fit versus high precision, but not sloppy. Fits a lot of foot shapes.
