

PRODUCT POSITIONING

A true technical hybrid, the Rapid LT is approach capable and trail ready. The Vibram® Megagrip sole provides friction and traction, while the knit fabric upper and full perimeter rand deliver lightweight support and protection. An anatomic shape with secure lacing delivers a comfortable yet precise fit, inspiring confidence underfoot no matter what terrain you encounter.

FEATURES AND BENEFITS

- 01** **Upper:** Knit fabric upper with **recycled content** and full perimeter rand deliver lightweight support and protection
- 02** **Rand:** Combination rand, rubber and TPU, which provides 360° protection and abrasion resistance.
- 03** **Toe Shape:** An ergonomic shape that is wider across the ball of the foot, balancing precision and comfort.
- 04** **Midsole:** Dual-density EVA with a TPU arch insert for torsion control.
- 05** **Outsole:** Vibram® outsole with Megagrip rubber compound with climbing zones at the toe and Brake System in the back, ensuring stability and grip.

SPECIFICATIONS

Upper: **Polyester Mesh** + TPU Overlays

Lining: Polyester

Insole: TPU Insert

Midsole: 2D EVA-CM

Outsole: Vibram® Agility XT / Megagrip

Last: **(M)** ARSAX
(W) ARSAX

Sizes: **(M)** 40-47 (½ sizes), 48 (whole sizes)
(W) 37-42 (½ sizes)

Weight: **(M)** 360g; 12.7oz (1/2 pair size 42)
(W) 300g; 10.6oz (1/2 pair size 38)

Origin: Vietnam

TECHNOLOGIES

TECHNOLOGY · MATERIALS · CONSTRUCTION

Vibram® Agility Sole — The outsole is molded in Megagrip rubber, with 4mm deep lugs designed with specific inclinations and angles to provide optimal traction, propulsion and braking, and features lateral grooves in the forefoot to enhance sole flex. The medial forefoot features an edging zone, providing more rubber contact with the rock under the big toe.

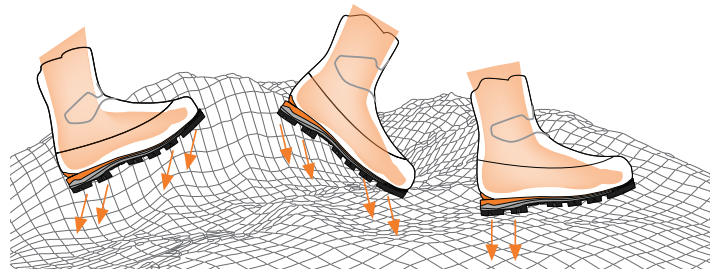

Vibram® Megagrip Rubber — Vibram® Megagrip rubber compound was developed for the most demanding conditions, where grip and friction take priority. Formulated specifically to perform in both wet and dry conditions, Megagrip rubber offers increased friction, with minimal reduction in durability. Megagrip is the ideal rubber compound for demanding activities such as trail running, approach, hiking and canyoneering.

EXO Construction — Highly breathable upper mesh is backed by our EXO internal support matrix, inspired by structural elements of the Golden Gate bridge. Welded PU reinforcements on the upper add additional structure, support and abrasion resistance.

SCARPA Planet Friendly — Our products tread the most wonderful and unspoiled landscapes on earth. We feel we must do our best to preserve these landscapes. "Planet Friendly", products made of environment-friendly materials refer to products in which materials and processes are specifically chosen for their environmentally friendly characteristics.

ACTIVimpact Technology — ACTIVimpact is a technology applied to the soles construction that uses materials with physical and chemical characteristics that absorb negative impacts with the ground and increase shock-absorbing features exploiting the utmost energy used during the activity.

FIT:

ARSAX last. Medium minus heel and midfoot fit, but wider across the ball of the foot, to strike the perfect balance between precision for technical approach use and comfort for hiking.
