

MORaine MID^{WP} + MORaine MID^{WP} WMN

63056/211 & 212

PRODUCT POSITIONING

Perfect for novice or veteran alike, the Moraine Mid WP is a super versatile hiking shoe that delivers comfort, support and traction in a nimble package. The premium nubuck upper is supportive and durable, and the waterproof breathable lining delivers the weather protection you need on the trail. A RECCO® receiver makes the wearer searchable out in the wilderness, for added peace of mind on any adventure.

M 63056/211

W 63056/212

FEATURES AND BENEFITS

- 01** **Upper:** Premium oiled nubuck leather. Special tanning process bond to the fibers for water-repellency, durability and breathability, with recycled fabric for reduced impact.
- 02** **Lining:** PFAS Compliant Waterproof Membrane.
- 03** **TPU Heel:** External molded TPU heel counter provides rear-foot stability.
- 04** **RECCO®:** RECCO reflector makes the wearer searchable for added peace of mind.
- 05** **Outsole:** PRESA® outsole works with the midsole to provide mechanical impact absorption, and our Super-Gum rubber compound provides confidence-inspiring traction.

- Upper:** 2.0mm - 2.2mm Oiled Nubuck Leather with 100% Recycled Fabric
- Lining:** PFAS Compliant Waterproof Membrane
- Insole:** Nylon Insert
- Midsole:** 2D EVA-CM
- Outsole:** PRESA® HIK-04 / SuperGum
- Last:** (M) RHA
(W) RHAW
- Sizes:** (M) 40-47 (½ sizes); 48-50 (whole sizes)
(W) 36-42 (½ sizes)
- Weight:** (M) 585g; 1lb 4.6oz (½ pair size 42)
(W) 495g; 1lb 2.5oz (½ pair size 38)
- Origin:** Vietnam

TECHNOLOGIES

MORaine MID^{WP} + MORaine MID^{WP} WMN

63056/211 & 212

TECHNOLOGY · MATERIALS · CONSTRUCTION

PRESA® Outsole – PRESA® is SCARPA's proprietary outsole brand, born out of 80+ years of technical outsole design experience, to deliver the best traction solutions available. Each PRESA® sole is carefully developed thinking about the context of use of the shoes. PRESA® combines midsole, compounds and design to get the most out of the sole, it is in fact the careful mix of these three elements that makes PRESA® products so innovative.

SuperGum Rubber – Exclusive to SCARPA, the SuperGum rubber compound was developed to provide equal or better slip resistance as compared to other high-friction rubbers but with vastly superior abrasion resistance. It was formulated to deliver high friction performance in both wet and dry conditions, but at the same time offers 3 times the abrasion resistance. SuperGum is the ideal rubber compound for SCARPA approach shoes.

PFAS Compliant Waterproof Membrane – A PU based waterproof-breathable membrane that is free of PFA's and protects the user from inclement conditions.

RECCO® Technology – SCARPA® is the first brand to integrate the RECCO® system in its trail products. It has proven a very effective solution and been adopted by an extensive and expanding network of ski resorts, helicopter skiing operations, parks, and search-and-rescue organizations in North and South America, Europe and Japan. RECCO® technology enables rapid directional pinpointing of a victim's precise location using harmonic radar. The two-part system consists of a RECCO® detector used by professional rescue teams and RECCO® reflectors that are integrated into the footwear.

SCARPA Planet Friendly – Our products are used to access the most wonderful and unspoiled landscapes on earth. We feel we must do our best to help preserve these landscapes for both current and future generations. The Planet Friendly designation appears on products designed to tread lighter on the planet, using eco-friendly resources and processes like recycled content materials, vegan friendly sourcing and plant-based plastics.

ACTIVfit SYSTEM

ACTIVfit Technology – ACTIVfit is a construction system that employs different last shapes, material combinations and construction techniques to provide the optimal fit and performance for the intended activity.

ACTIVimpact TECHNOLOGY

ACTIVimpact Technology – ACTIVimpact is a technology applied to the soles construction that uses materials with physical and chemical characteristics that absorb negative impacts with the ground and increase shock-absorbing features exploiting the utmost energy used during the activity.

FIT:
RHA last. Medium volume heel and mid-foot fit, with a rounded, more open toe profile. Not quite as much rocker built in as the Rush and Rush Mid GTX, for a little more traditional hiking feel and fit.
