

## PRODUCT POSITIONING

Our iconic Helix gets a thoughtful refresh, blending all-day comfort with reliable performance. Built on a new last with added space in the forefoot, it features a full-length Vibram® sole for edging power and support, plus extended lacing for a precise, adjustable fit. The Helix is an ideal choice for everyone - from new climbers learning the ropes to guides spending long days on the wall.

With a chrome-free suede upper, 25% recycled rubber rand, the latest Helix also raises the bar in sustainability. Whether you're tackling multi-pitch routes, or long trad days, this versatile shoe offers the durability and comfort you can count on.

## FEATURES AND BENEFITS

- 01 **Upper:** Planet friendly, chrome free Eco Suede is both durable and supple. It features a recycled microfiber backing for additional comfort and durability.
- 02 **Toe Wrap:** Provides wrapping support for more precision
- 03 **Closure:** Lace-to-toe lacing provides fit and adjustability.
- 04 **Fit:** Comfortable all-day fit: suitable for anyone from new climbers to professional guides.
- 05 **Outsole:** Full-length Vibram® XS Edge for edging power and underfoot support

Weight: (M) 235g; 8.3oz (½ pair, size 41)  
(W) 200g; 7.1oz (½ pair size 38)

Origin: Romania

## TECHNOLOGIES

## TECHNOLOGY · MATERIALS · CONSTRUCTION

**Passive Randing System** – Passive randing is constructed and tensioned for situations where the primary focus is not dynamic support, but instead – comfort. New climbers developing footwork, professional guides leading all day trips, and long multi-pitch climbing are all examples of where comfort is equally as important and beneficial as performance is.

**Eco Leather** – Planet friendly, chrome free Eco Suede is both durable and supple. It features a recycled microfiber backing for additional comfort and durability.

**Flexan** – Flexan is an Italian made insole board material made primarily of cellulose. Cellulose is the most abundant organic material on the planet, typically derived from cotton or wood pulp. The cellulose fibers are combined with binding agents that yield a durable, yet flexible sheet material that can be sourced in varying thicknesses. It is durable, flexible and easy to work with.

**Vibram® XS Edge** – Developed to provide maximum edging support, the Vibram® XS Edge delivers good grip while adding improved firmness for the most challenging edging moves.

**SCARPA Planet Friendly** – Our products tread the most wonderful and unspoiled landscapes on earth. We feel we must do our best to preserve these landscapes. "Planet Friendly", products made of environment-friendly materials refer to products in which materials and processes are specifically chosen for their environmentally friendly characteristics.

**Fit** – Men's: FFA Last – Medium width, low angle toe box with medium volume heel.  
Women's: EDA Last: Medium width, low angle toe box with medium volume heel.
