

## PRODUCT POSITIONING

The Mont Blanc GTX is a rugged, high-performance mountain boot built for professionals tackling demanding backcountry environments. With exceptional stability on uneven terrain and robust protection against rocks and debris, it's ideal for trail crews, forestry workers, mountain guides, and rescue teams. A 9" height with thermo-molded ankle support, external TPU heel counter, and full rubber rand enhance durability and ankle protection in tough conditions. Featuring a waterproof, breathable GORE-TEX® ePE membrane and thermal-insulated footbed, the Mont Blanc GTX keeps feet dry and comfortable during long hours in unpredictable weather. The Vibram® Mont outsole ensures dependable traction and easy cleaning, while the Perwanger® suede leather upper with recessed high-tenacity stitching delivers long-lasting performance.

## FEATURES AND BENEFITS

- 01 Upper:** Perwanger suede leather paired with GORE-TEX® ePE membrane offers durable, waterproof and breathable protection - keeping your feet dry and comfortable in the harshest mountain environments.
- 02 Ankle Cuff:** The 9-inch high cut with a thermo-molded collar offers excellent ankle support and structure, enhancing stability and protection when moving across uneven or technical ground.
- 03 Construction:** Built for endurance, the boot features recessed high-tenacity stitching and a full-perimeter rubber rand for maximum durability and abrasion resistance in harsh, high-impact environments.
- 04 Midsole:** A PU midsole with an injected TPU chassis absorbs shock while providing structure under heavy loads, ensuring all-day comfort and support over long distances.
- 05 Outsole:** Vibram® Essential outsole with Mont compound offers dependable traction and durability on rugged terrain. Laser-textured design sheds mud and debris for better grip and easier cleanup.

## SPECIFICATIONS

Upper: 3mm Suede Perwanger HS 12 + S-Tech Fabric  
 Lining: GORE-TEX® ePE (PFAS Compliant)  
 Insole: Pro-Fiber 20  
 Midsole: PU + TPU  
 Outsole: Vibram® Essential / Mont  
 Last: AG  
 Sizes: 40-47 (½ sizes); 48 (whole sizes)  
 Weight: 1800g; 21lb 6oz (½ pair size 42)  
 Origin: Italy

## TECHNOLOGY · MATERIALS · CONSTRUCTION

**GORE-TEX® ePE** — GORE-TEX® ePE membrane is a revolutionary new waterproof/breathable material that is light, strong and made without PFAS, setting the standard for technical storm protection. This new GORE-TEX® enable a lower carbon footprint through the use of a new lower-mass membrane and selected textiles.

**Vibram® Outsole** — The Vibram® outsole featuring Mont rubber compound is optimized for mountaineering activities. Vibram® Mont compound was specifically developed to provide the highest reliability in the most difficult terrain at lower temperatures, and has been tested to verify performance on the highest peaks in the world. The Mont compound is a firmer rubber for added durability and secure crampon interface.

**Perwanger® Suede leather** — Perwanger is a family owned Italian leather tannery that has been in operation since 1780. They are recognized for making some of the finest and most durable leather for heavy duty outdoor applications like mountaineering and trekking. All Perwanger leathers are the result of a careful process. Beginning with the hides, which are carefully selected from alpine cattle from the mountains of Northern Italy, the leather then undergoes special processing and finishing stages to deliver an extremely durable product, with a smooth and consistent surface grain that is highly water resistant and very durable — perfect for SCARPA mountaineering and trekking boots.

**SCARPA Planet Friendly** — Our products are used to access the most wonderful and unspoiled landscapes on earth. We feel we must do our best to help preserve these landscapes for both current and future generations. The Planet Friendly designation appears on products designed to tread lighter on the planet, using eco-friendly resources and processes like recycled content materials, vegan friendly sourcing and plant-based plastics.

## SOCK-FIT<sup>XT</sup>

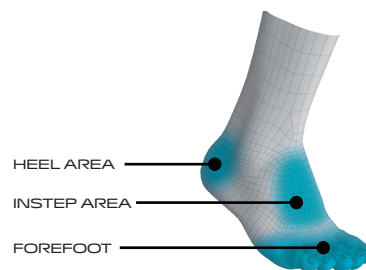

BY SCARPA

**Sock-Fit XT System** — The tongue and ankle collar are constructed in a single piece of elastic S-tech Shoeller® breathable and water-resistant fabric, minimizing seams and reducing bulk for a precision fit and reduced weight.

## ACTIV<sup>fit</sup> SYSTEM

**ACTIVfit Technology** — ACTIVfit is a construction system that employs different last shapes, material combinations and construction techniques to provide the optimal fit and performance for the intended activity.

### Last /Fit Description:

AG last was developed for a precise but comfortable fit for long days in the mountains, this last runs is considered medium volume and width, accommodating but still shaped for performance. Great heel hold and a performance fit throughout.
