

PRODUCT POSITIONING

Comfortable, durable and undeniably classic, the flat-lasted Helix combines basic yet refined features to yield one of our most popular shoes. With a highly adjustable, lace to toe closure, padded tongue and relatively symmetrical profile, the Helix is perfect for a wide range of climbers and uses: from professional guides on multi-day trips, to advancing climbers pushing their limits for hours on end in the gym, the Helix is for any climber prioritizing all-day comfort.

 (W) 200g; 7.1oz (½ pair size 38)
 Origin: Romania

TECHNOLOGIES

TECHNOLOGY · MATERIALS · CONSTRUCTION

Passive Randing System – Passive randing is constructed and tensioned for situations where the primary focus is not dynamic support, but instead – comfort. New climbers developing footwork, professional guides leading all day trips, and long multi-pitch climbing are all examples of where comfort is equally as important and beneficial as performance is.

**PASSIVE
SYSTEM**

Vibram® XS Edge – Developed to provide maximum edging support, the Vibram® XS Edge delivers good grip while adding improved firmness for the most challenging edging moves.

Fit – Men's: FF Last – Medium width, low angle toe box with medium volume heel.

Women's: ED Last: Medium width, low angle toe box with medium volume heel.
