

## PRODUCT POSITIONING

The limited edition Maestrale Re-Made is the most planet friendly and sustainable ski boot we've ever produced. Light-weight, warm, and versatile, this model is ideal for the eco-conscious skier looking for a boot that skis as well as it tours while also having low impact on the environment. Using an innovative manufacturing process, we have been able to re-process production scraps that we have collected in our factory for over 2 decades, creating a high performance, sustainable alternative to virgin plastic. The glove-friendly Finger Strap is 100% PVC free, contains 50% recycled content, and also features RECCO® for increased avalanche searchability. SCARPA will donate 100% of profits made on The Maestrale Re-Made to POW (Protect Our Winters). Step into sustainable performance!

12055/500

## FEATURES AND BENEFITS

- 01** **Shell:** Dual-density Pebax® Re-Made® Lambda Frame shell delivers on uphill and downhill performance
- 02** **Pebax Re-Made® Thor Cuff**
- 03** **Pebax Re-Made® Thor Tongue**
- 04** **PVC Free / 50% Recycled Finger Strap**
- 05** **Liner:** Intuition® liner is thermoformable and guarantees a warm, precise and comfortable fit.

## SPECIFICATIONS

Size:	24.5 - 32 (half sizes)
Weight:	1490g; 3lb 2.9oz (½ pair size 27)
Shell · Cuff · Tongue:	Pebax Re-Made®
Liner:	SCARPA® Pro Flex Touring
Last:	101mm
Flex:	110
Ski/Walk Mode:	Speed Lock XT
Closure:	3 Buckles + Finger Strap
Forward Lean:	16° ± 2°
Range of Motion:	60°
Outsole:	Vibram® Cayman Pro (ISO 9523)
Binding System:	TLT, AT
Origin:	Italy

## TECHNOLOGIES

## TECHNOLOGY · MATERIALS · CONSTRUCTION

**Pebax Re-Made®** – Pebax® Re-Made is a recycled Pebax consisting of production scraps that we have collected in our factory for over 2 decades to create a high performance, sustainable alternative to virgin plastic. Re-Made Pebax consists of 90% recycled content and 10% new content. This creates a material equally as strong and dependable as our regular Pebax formula, while at the same time reducing overall manufacturing CO2 emissions by 27%.

**Pebax® Elastomers** – Designed for extreme conditions, Pebax® elastomers are a premium performance material that has been used for many years in winter sports equipment. They offer a unique combination of high performance properties: sustained flexibility at low temperature, high cold impact resistance, and outstanding energy return. These elastomers are typically 20% lighter than common materials. They combine a polyamide 12 rigid block (PA12) with a hydrophobic polyether soft chain. Bridging the gap between thermoplastics and rubbers, Pebax® materials are an excellent choice for AT ski boots.

**Vibram® Outsole** – Founded in 1935, Vibram sets the performance standard for outdoor footwear soles. Innovative designs and soling technologies means there is a Vibram sole or rubber compound for all of SCARPA's performance footwear needs. In the SKI category, intelligent lug design combines with Vibram's Top 85 rubber compound to deliver the performance characteristics required by the SCARPA R&D team. Top 85 compound is a rubber compound that has been formulated specifically to provide durability and grip in cold conditions.

**Intuition®** – Intuition liners are the gold standard for lightweight, warm, thermo-formable ski boot liners. SCARPA is the long time, exclusive partner of Intuition in the alpine touring and telemark categories, bringing you the ultimate in back-country performance, fit and comfort. Intuition liners feature multi-density layups of closed-cell foam that is thermally moldable, allowing you to customize a perfect fit and enjoy the ultimate in comfort, durability and warmth in the backcountry.

**RECCO® Technology** – SCARPA® is the first brand to integrate the RECCO® system in its boots. It has proven a very effective solution and been adopted by an extensive network of ski resorts, helicopter skiing operations, parks, and search-and-rescue organizations in Europe, Japan, North and South America. RECCO® technology enables rapid directional pinpointing of a victim's precise location using harmonic radar. The two-part system consists of a RECCO® detector used by professional rescue teams and RECCO® reflectors that are integrated into the FBC strap on the boots.

**Wave Closure System** – The Wave closure system, made exclusively for SCARPA®, delivers two buckle closure strength security without adding extra weight.

**Alpine Axial Hybrid Construction** – The new Alpine Axial Hybrid closure system is specially designed for hybrid boots that can be used for both on-piste and off-piste skiing. Thanks to the straps installed on the tongue and linked at the mid-point of the shell, it provides a snug fit at the forefoot, as well as ensuring a precise fit for all kinds and sizes of feet, as with the classic overlapping ski boot construction.

**SCARPA Planet Friendly** – Our products are used to access the most wonderful and unspoiled landscapes on earth. We feel we must do our best to help preserve these landscapes for both current and future generations. The Planet Friendly designation appears on products designed to tread lighter on the planet, using eco-friendly resources and processes like recycled content materials, vegan friendly sourcing and plant-based plastics.
