

PRODUCT POSITIONING

A favorite of mountain guides and rescue professionals around the world, the Zodiac Tech GTX sets the standard for lightweight, technical mountain boots. Innovative BAS Technology redefines underfoot security and precision, while the premium leather upper and external heel containment provide all-day support, stability and protection. If your plans involve long days move through technical mountain terrain, the Zodiac Tech GTX has you covered.

FEATURES AND BENEFITS

- 01** **Upper:** Perwanger Nepal Suede Leather with a special tanning process that bonds to the fibers for water-repelling durability and breathability.
- 02** **Rand:** Full perimeter rubber and PU rand for maximum performance and protection.
- 03** **Sock-Fit XT:** One-piece tongue and ankle collar construction reduces bulk and creates a snug fit.
- 04** **Bascula Adaptive System:** BAS Midsole allows lugs to independently adapt to terrain, maintaining better ground contact for stability and traction.
- 05** **Molded Heel Counter:** External molded heel counter provides rear foot stability and containment.

SPECIFICATIONS

Upper: 1.8mm Suede Perwanger Nepal
 Lining: GORE-TEX® ePE (PFAS Compliant)
 Insole: Pro-Fiber 20
 Midsole: 2D PU
 Outsole: Vibram® BAS Precision Cramp / Mont
 Last: BZH
 Sizes: 39-47 (½ sizes); 48 (whole sizes)
 Weight: 680g; 1lb 8.0oz (½ pair, size 42)
 Origin: Italy

TECHNOLOGY · MATERIALS · CONSTRUCTION

GORE-TEX® ePE — GORE-TEX® ePE membrane is a revolutionary new waterproof/breathable material that is light, strong and made without PFAS, setting the standard for technical storm protection. This new GORE-TEX® enable a lower carbon footprint through the use of a new lower-mass membrane and selected textiles.

Vibram® Outsole — The Vibram® outsole featuring Mont rubber compound is optimized for mountaineering activities. Vibram® Mont compound was specifically developed to provide the highest reliability in the most difficult terrain at lower temperatures, and has been tested to verify performance on the highest peaks in the world. The Mont compound is a firmer rubber for added durability and secure crampon interface.

Perwanger® Nepal Suede leather — Perwanger is a family owned Italian leather tannery that has been in operation since 1780. They are recognized for making some of the finest and most durable leather for heavy duty outdoor applications like mountaineering and trekking. All Perwanger leathers are the result of a careful process. Beginning with the hides, which are carefully selected from alpine cattle from the mountains of Northern Italy, the leather then undergoes special processing and finishing stages to deliver an extremely durable product, with a smooth and consistent surface grain that is highly water resistant and very durable — perfect for SCARPA mountaineering and trekking boots.

Bascula Adaptive System (BAS) — BAS midsole allows lugs to independently adapt to the terrain, maintaining better ground contact. The midsole has two densities of PU, with softer zones that allow the lugs to independently adapt to surface irregularities, improving grip and stability.

SCARPA Planet Friendly — Our products are used to access the most wonderful and unspoiled landscapes on earth. We feel we must do our best to help preserve these landscapes for both current and future generations. The Planet Friendly designation appears on products designed to tread lighter on the planet, using eco-friendly resources and processes like recycled content materials, vegan friendly sourcing and plant-based plastics.

SOCK-FIT^{XT}

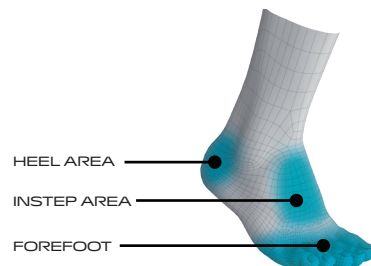

BY SCARPA

Sock-Fit XT System — The tongue and ankle collar are constructed in a single piece of elastic S-tech Shoeller® breathable and water-resistant fabric, minimizing seams and reducing bulk for a precision fit and reduced weight.

ACTIV^{fit} SYSTEM

ACTIVfit Technology — ACTIVfit is a construction system that employs different last shapes, material combinations and construction techniques to provide the optimal fit and performance for the intended activity.

Last /Fit Description:

BZH last / developed for a precision fit on heavy approaches and for alpine climbing capability, this last runs a little narrower than normal, but the lace-to-toe system accommodates a surprising number of foot shapes. Great heel hold and a performance fit throughout.
