

PRODUCT POSITIONING

The ultimate backcountry field boot, the Rebel 10 HD is the perfect footwear choice for long days below or above treeline in the mountains. Developed in collaboration with expert hunters and guides, the insulated Rebel 10 HD is one of the lightest 10" tall boots on the market that still provides the mountain-worthy support, protection and traction needed to move through rugged terrain. The mostly synthetic upper backed by HDry® and Primaloft® means you will stay warm and dry as you pursue your objectives in the field.

FEATURES AND BENEFITS

- 01** **Upper:** Light and agile, the fabric, PU leather and PU Tek upper is supportive, breathable and dries quickly. Backed by HDry® and Primaloft®
- 02** **Rand:** Full perimeter rand combines Rubber and PU to provide 360 degree protection on the upper.
- 03** **Extended Ankle Collar:** The extended height collar with stretch fabric provides extra support and protection.
- 04** **Insulation Lining:** The Primaloft® Gold Eco insulation lining, made from 90% recycled materials, provides superior warmth and comfort in extreme conditions.
- 05** **Outsole:** Vibram® Total Traction outsole molded with Mont rubber compound, offers legendary traction and durability underfoot.

SPECIFICATIONS

Upper: S-Tech + PU Tek + Microtech + Suede
 Lining: HDry® (PFAS Compliant) + Primaloft® Gold Insulation Eco (90% Recycled)
 Insole: Pro-Fiber 20
 Midsole: 2D PU
 Outsole: Vibram® Total Traction / Mont
 Last: NAG
 Sizes: 39-47 (half sizes); 48 (whole size)
 Weight: 785g; 1lb 11.7oz (½ pair, size 42)
 Origin: Italy

TECHNOLOGIES

TECHNOLOGY · MATERIALS · CONSTRUCTION

Primaloft® Gold Eco — Primaloft® Gold Eco is used to insulate the lower foot of the inner boot, and features 100% recycled content plus grip control, which enhances the structural integrity of the insulation, improving fit and performance.

HDry® B5 Membrane — The HDry® B5 Membrane is an advanced waterproof and breathable barrier specifically designed for outdoor footwear. Engineered to provide maximum protection against moisture, the membrane is directly laminated to the upper, creating a seamless, fully waterproof shield that prevents water from entering the boot. This PFAS-compliant membrane ensures environmentally conscious performance while maintaining high breathability, allowing moisture from sweat to escape and keeping feet dry and comfortable. The HDry® B5 Membrane's innovative construction enhances overall durability and thermal regulation, making it ideal for rigorous backcountry and alpine conditions.

Vibram® Outsole — The Vibram® outsole featuring Mont rubber compound is optimized for mountaineering activities. Vibram® Mont compound was specifically developed to provide the highest reliability in the most difficult terrain at lower temperatures, and has been tested to verify performance on the highest peaks in the world. The Mont compound is a firmer rubber for added durability and secure crampon interface.

SOCK-FITXT

BY SCARPA

Sock-Fit XT System — The tongue and ankle collar are constructed in a single piece of elastic S-tech Shoeller® breathable and water-resistant fabric, minimizing seams and reducing bulk for a precision fit and reduced weight.

ACTIVimpact

TECHNOLOGY

ACTIVimpact Technology — ACTIVimpact is a technology applied to the soles construction that uses materials with physical and chemical characteristics that absorb negative impacts with the ground and increase shock-absorbing features exploiting the utmost energy used during the activity.

Last /Fit Description:

NAG last was developed for a precise but comfortable fit for long days in the mountains, this last runs is considered medium volume and width, accommodating but still shaped for performance. Great heel hold and a performance fit throughout.
